

AT# Internet Plug-In

Let your Wireless Module Speak IP

Fully Integrated

The AT# Internet Plug-In is a full TCP/IP stack loaded on the Wavecom Open AT® environment. The eDevice library and application empower the Wavecom Quik Series : New Q24 & Q2686.

Field Proven Technology

The AT# Internet Plug-In is already used in more than 2 million wireless modules all over the world.

Standard Protocols

In-house RFC Compliant TCP/IP stack with standard Internet applications driven by widely spread eDevice AT# interface.

Cost & Time Saving

The intuitive set of AT# serial commands reduces the time-to-market and offloads the TCP/IP burden from your processor.

Easy-to-Use

```
/*AT# Serial Port Command sample*/
AT#SendMail //send an email
AT#FTPGet //download an FTP file
```

IP Connectivity Features

- ✓ GSM data CSD
 - PPP Client & PPP Server
- ✓ GPRS Attachment
 - Connection to APN server
- ✓ DNS Client for IP-address resolution
- ✓ ICMP protocol
 - Answer/Send ping requests
- ✓ TCP Socket
 - Outgoing or listen mode
- ✓ UDP Socket
 - Send/Receive data over UDP
- ✓ FTP Client
 - Send/Receive files to/from FTP server
- ✓ POP3 Client – receive emails
- ✓ SMTP Client – send emails
